

## Refined Backlog:

- As a user I want to create an account on the site so that be able to log in and save my information.
- As a user I want to navigate the site so that seeing restaurants on it and seeing their meals and make orders.
- As a user I want a payment methods page so that purchase any order
- As an administrator I want an admin side so that edit everything on the site.
- As a delivery I want to see order information so that knowing where I go with the order.

## Output:

Tasks	Hours or sprints
Login page	1 sprint
Search par for navigate restaurants and meals.	1 sprint
Part on site for add to cart	1 sprint
Payments page	1 sprint
Admin side pages	3 sprints
